

September 29, 1958

Dr. Herman N. Eisen
Department of Dermatology
Washington University School of Medicine
St. Louis, Missouri

Dear Herman:

I would be grateful for reprints of your papers of the last few years on hypersensitivity and antibody specificity. The enclosure may illustrate the interest that underlies my request.

As you may have heard from Art Kornberg I am moving to Stanford next year to a Department of Genetics in the new medical center. We may have some opportunity to pursue a genetic line of reasoning in re antibody formation after getting set up there.

Yours,

Joshua Lederberg
Professor of Medical Genetics
